Léonard Mangallon - Developer, teacher

Education, technology and efficiency

I find your 4 Hour Workweek approach of the k-12 education really inspiring!
As a French tutor, for years I increasingly integrated technology into my
teaching methods. About a year and a half ago, I decided to take a significant
leap by learning coding to develop custom EdTech tools. I learned
programming at 42, a renown (6th place World University Rankings for
Innovation) coding school. 42 has a peer-to-peer approach and relies on non-
formal education school (teacher-less and students have freedom to learn
their own way)

For these reasons and because I always focused on efficiency in my teaching
and learning 2 Hour Learning resonate with me.

I am part of a startup that develop innovative data acquisition for AI training
solutions and I did a couple quick and fun projects like LoveLetter: an AI-based
language learning tool, but I am eager to combine my background in
education with my coding skills to make learning more efficient and empower
students to regain control over their education.

Italian	- B1

Employment History

Chatpay: hackathon project turned startup
JUNE 2024 - PRESENT

ChatPay is a Telegram app that lets users sell their chats for LLM training. In our team of 5 I am responsible for strategy and business meetings with partners and potential investors, pitching but also front end development, setting up organization and tools (Linear, staged environment, conventional commits and so on)

Tech stack on front end: React with MWS mocked endpoints, tailwind.

Freelance Developer and Collaboration with instagrammer FrancuskaLiterka
FEBRUARY 2024

LoveLetter is my first web application: integrating OpenAI and Deepl API. This app generates personalized, entertaining love texts, doubling as a tool for users to learn French in a fun and engaging way.

Tech stack: Node.js, Next.js, JavaScript, React, and Tailwind.

Founder at Araki Cycles , Breslau, Poland
JULY 2021 — PRESENT

Established and oversee all aspects of "Araki Cycles," a carbon fiber bicycle saddle manufacturing startup.

Founder and French Language Instructor at Frenchezleo,
JULY 2018 — PRESENT

Founded and managed "Frenchezleo," a language instruction business specializing in teaching French.

- Freelance language instruction for individuals and corporate client.

Chef and Sailor on Various Luxury Yachts, French Azur Coast
JANUARY 2018 — SEPTEMBER 2020

Worked with high-profile clients onboard M/Y Jag'b, M/Y Conquest of 1966, M/Y Africa Dream maintaining the highest standards in my expertise as a chef, crew-member (team-player on steroids).

Education

Software engineering, 42 Berlin, Berlin
NOVEMBER 2023 — PRESENT

- P2P and soft skills approach to software engineering
- Project management, teamwork skills, practical, hands-on learning.
- Administrator at Fablab Berlin.

Baccalauréat,
JANUARY 2011

Sociology-History-Ethnology, the University of Nanterre, Paris
JANUARY 2011 — NOVEMBER 2011
